

We are excited to announce that iTV-3 has entered into a public private partnership with the UC2B Fiber Optic Network located throughout Champaign and Urbana. This was achieved with the help of UC2B, the cities of Champaign, Urbana, and the University of Illinois in order to facilitate the construction of a 100% Fiber to the Premise Network throughout the Champaign and Urbana communities. You can fill out our contact form on www.theperfectupgrade.com and an iTV-3 representative will contact you to explain your service options and sign you up should you choose. iTV-3 will be engineering the cities into neighborhoods of 150 to 350 homes. Once a neighborhood reaches 50% of the residents requesting service iTV-3 will construct the neighborhood and install customer services. We will be building the community in the order of neighborhoods which meet the sign up commitment level so make sure to tell your friends and neighbors to sign up too!

iTV-3 is initially signing residents up for Internet and Voice packages only but does plan on having a video offering in the community. Before iTV-3 can offer video we must first obtain a Television Franchise Agreement with both Cities. Please indicate if you are interested in TV service while signing up but please do sign up. iTV-3 can also help you to better understand your options of receiving TV entertainment through your Internet connection and in most cases save you quite a bit of money in the process. Please ask your iTV-3 representative to explain how you can “ditch” cable.

It is important to note that we do need to verify your signup with your payment information. We do this to prevent false sign up’s from people who may wish to sign up all of their neighbors to get fiber service to the neighborhood faster. Although we do collect payment information to verify the sign up you will not be charged anything until we call you to schedule your installation.
